## Plan Overview

*A Data Management Plan created using DMPonline*

**Title:** Model - DMP TPM Interviews

**Creator:** Nicolas Dintzner

**Affiliation:** Delft University of Technology

**Template:** TU Delft Data Management Plan template (2021)

**ID:** 83209

**Last modified:** 26-01-2024

### **Copyright information:**

The above plan creator(s) have agreed that others may use as much of the text of this plan as they would like in their own plans, and customise it as necessary. You do not need to credit the creator(s) as the source of the language used, but using any of the plan's text does not imply that the creator(s) endorse, or have any relationship to, your project or proposal

# Model - DMP TPM Interviews

---

## 0. Administrative questions

### 1. Name of data management support staff consulted during the preparation of this plan.

Nicolas Dintzner

### 2. Date of consultation with support staff.

2022-12-12

## I. Data description and collection or re-use of existing data

### 3. Provide a general description of the type of data you will be working with, including any re-used data:

Type of data	File format(s)	How will data be collected (for re-used data: source and terms of use)?	Purpose of processing	Storage location	Who will have access to the data
Interview recording	MP4/AVI	During the interview	Capturing expert's opinion on ZZZZZZ	TU Delft OneDrive	My name - and my supervisor (name), group leader (name), partners (names)
Survey Answers	txt	survey distributed through partners	capturing opinion of experts on XXXX	Qualtrics server in TUD	My name - and my supervisor (name), group leader (name), partners (names)
Interview transcripts	.txt, .odt, .pdf, .doc (the one you will use)	Produced from the interview recording	Capturing expert's opinion on ZZZZZZ	TU Delft OneDrive	(Same - don't be the only one to have access to your data!)
Anonymized transcripts / interview Summary	txt, .odt, .pdf, .doc (the one you will use)	Produced from the transcripts	Provided a privacy preserving version of the data for long term archival	TU Delft OneDrive	TUD supervisor + Company Supervisor
Participant's list	Excel spreadsheet	Professional network.	Finding expert in the domain of XXX	TU Delft OneDrive	(same)
Report (I would leave out scientific pubs)	.pdf	Serves as record of the process as well as documentation	Long term documentation	TU Delft OneDrive	(Same)
Software models	python				

Here

#### 4. How much data storage will you require during the project lifetime?

- < 250 GB

## II. Documentation and data quality

#### 5. What documentation will accompany data?

- Data will be deposited in a data repository at the end of the project (see section V) and data discoverability and re-usability will be ensured by adhering to the repository's metadata standards
- Methodology of data collection
- README file or other documentation explaining how data is organised

Supporting material (anonymized transcripts) will be stored in a public archive with a documentation file (README), indicating where to find the associated MSc thesis (for more documentation), as well as detailed information about what is being shared (folder structure, time of interview,...). We will also provide a copy of a consent form used during this research.

### III. Storage and backup during research process

#### 6. Where will the data (and code, if applicable) be stored and backed-up during the project lifetime?

- OneDrive

We will organize the data as follows:

The OneDrive repository will contain a folder for Interviews, in which each sub-folder will contain all documents pertaining to a single interview - the proof of consent, recording, transcripts

### IV. Legal and ethical requirements, codes of conduct

#### 7. Does your research involve human subjects or 3rd party datasets collected from human participants?

- Yes

#### 8A. Will you work with personal data? (information about an identified or identifiable natural person)

*If you are not sure which option to select, ask your [Faculty Data Steward](#) for advice. You can also check with the [privacy website](#) or contact the privacy team: [privacy-tud@tudelft.nl](mailto:privacy-tud@tudelft.nl)*

- Yes

(You need to store their names, plan the meetings,... you WILL process personal data as part of your activities!)

Survey , company,

The survey will collect the following demographic information about participants:

- 
- age (ranges)
- education
- ...
- ...

**8B. Will you work with any types of confidential or classified data or code as listed below? (tick all that apply)**

*If you are not sure which option to select, ask your [Faculty Data Steward](#) for advice.*

- Yes, data which could lead to reputation/brand damage (e.g. animal research, climate change, personal data)

Pick the last one if you are doing professional interviews - and not getting "business critical information".

**9. How will ownership of the data and intellectual property rights to the data be managed?**

*For projects involving commercially-sensitive research or research involving third parties, seek advice of your [Faculty Contract Manager](#) when answering this question. If this is not the case, you can use the example below.*

For MSc students: the ownership of the output you produce is "mostly" yours.

For PhD Students/researchers: the ownership of the output you produce is "mostly" TUD.

If you want to create a product/service, just get ready to discuss with the Valorization Center early in your process to figure out the details.

For small project & MSc thesis: (NOTE! This means you will waive your right to the data, to make it public!).

relevant part of data supporting this work will be made available in a research data repository under an open license.

For large project:

The IP is regulated by the grant agreement under which this work is performed. The document can be found .... (URL?).

**10. Which personal data will you process? Tick all that apply**

- Signed consent forms

- Data collected in Informed Consent form (names and email addresses)
- Photographs, video materials, performance appraisals or student results
- Names and addresses
- Email addresses and/or other addresses for digital communication
- Other types of personal data - please explain below

- Domain of activity + generic job description

NOTE: We care mostly about the information you will use for your research (what you will split your population on - e.g. if you do videos, you will collect the gender... but if your study is not gender centered, I would not tick it).

NOTE: if you "think" you could collect "special category", then tick the box. That one is important.

Other demographics:

- company in which they work (name)
- job description (is it their job title ? Or elements of a standard type of job?)
- age : in range of 10 years
- gender: M/F/Others (I'm not sure it's the standard one here... but indicate ranges and options)

## **11. Please list the categories of data subjects**

Data subjects are professionals working in the domain of XXXXX within companies located in YYYY

## **12. Will you be sharing personal data with individuals/organisations outside of the EEA (European Economic Area)?**

- No

## **15. What is the legal ground for personal data processing?**

- Informed consent

## **16. Please describe the informed consent procedure you will follow:**

COPY/PASTE and adapt the example below. It's just fine.

## **17. Where will you store the signed consent forms?**

- Same storage solutions as explained in question 6

For each interview: 1 folder

- consent form
- interview recording
- interview notes (if any)
- transcripts
- anonymized transcripts

## **18. Does the processing of the personal data result in a high risk to the data subjects?**

**If the processing of the personal data results in a high risk to the data subjects, it is required to perform a [Data Protection Impact Assessment \(DPIA\)](#). In order to determine if there is a high risk for the data subjects, please check if any of the options below that are applicable to the processing of the personal data during your research (check all that apply).**

**If two or more of the options listed below apply, you will have to [complete the DPIA](#). Please get in touch with the privacy team: [privacy-tud@tudelft.nl](mailto:privacy-tud@tudelft.nl) to receive support with DPIA.**

**If only one of the options listed below applies, your project might need a DPIA. Please get in touch with the privacy team: [privacy-tud@tudelft.nl](mailto:privacy-tud@tudelft.nl) to get advice as to whether DPIA is necessary.**

**If you have any additional comments, please add them in the box below.**

- None of the above applies

(This is highly unlikely for professional interviews)

## **22. What will happen with personal research data after the end of the research project?**

- Anonymised or aggregated data will be shared with others
- Personal research data will be destroyed after the end of the research project

NOTE: you usually only need statements from professional, and basic background info to justify their perspective is relevant.

## **V. Data sharing and long-term preservation**

### **27. Apart from personal data mentioned in question 22, will any other data be publicly shared?**

- All other non-personal data (and code) underlying published articles / reports / theses

(I'm assuming it's all interviews and literature)

- consent form template
- anonymized trans.

**29. How will you share research data (and code), including the one mentioned in question 22?**

- My data will be shared in a different way - please explain below
- All anonymised or aggregated data, and/or all other non-personal data will be uploaded to 4TU.ResearchData with public access

TUD Education repo, with the MSc thesis.

**30. How much of your data will be shared in a research data repository?**

- < 100 GB

**31. When will the data (or code) be shared?**

- As soon as corresponding results (papers, theses, reports) are published

**32. Under what licence will be the data/code released?**

- CC BY-SA
- Other - Please explain

CC BY is a decent default, unless you are working on a specific project.

**VI. Data management responsibilities and resources**

**33. Is TU Delft the lead institution for this project?**

- Yes, the only institution involved

WANRING: partners are important, especially if you will share data with them during the research process (company in which you are doing your internship for instance).

**34. If you leave TU Delft (or are unavailable), who is going to be responsible for the data resulting from this project?**

Name someone who has a chance to be able to identify what is what in your data.

**35. What resources (for example financial and time) will be dedicated to data management and ensuring that data will be FAIR (Findable, Accessible, Interoperable, Re-usable)?**

No additional resources will be required.
